DETAILED ACTION

Allowable Subject Matter

Claims 1-9 and 21-37 are allowed.

The following is an examiner's statement of reasons for allowance: Nakamura (US Patent 6381143) discloses an IC card comprising a wiring substrate, connection terminals, controller chip, flash memory chip and resin covering the flash memory and controller chips. With respect to independent claim 1 Nakamura does not disclose that the controller chip and memory chip are on a front surface of the substrate and that the external connecting terminals are on the rear surface of the substrate, Nakamura also does not disclose that the planar outlines of the wiring substrate is smaller than half of a planar outline of the case and that the wiring substrate is entirely disposed in an area of the case closer to the first end side with respect to a middle position between the first and second sides of the case. With respect to independent claim 29 Nakamura does not disclose that the controller chip for the first flash memory chip and the first flash memory chip are arranged over the front surface of the substrate, Nakamura also does not disclose that in a direction of a long side of the case, a length of the substrate is smaller than a length of one half of the case and that the substrate is entirely disposed in the first area. Furthermore there is no evidence in the prior art making obvious these specific changes to the IC card of Nakamura.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
